

The Orion 200i²

Pulse Arc and Resistance Welder

The Orion 200i² is packed with new features that will simplify the welding needs of any jeweler, goldsmith, or silversmith. Innovative new features include – the new Pico weld mode for intricate welds as small as 0.01 Joules of energy, to achieve truly microscopic weld joints; user selectable up to 200 joules of energy for large silver or platinum pieces; a large 10" touch screen interface with one-touch access to all welding parameters; the ultimate space saving design; and 3 unique pulse shape wave form options to choose from: Classic Orion (for Orion users that have come to love welds produced by the Orion 150i), Triangle (for weld smoothing), and Square (laser like welding). And introducing the new Seam mode—a revolutionary breakthrough in micro pulse arc welding. Seam mode allows users to mimic laser welding with weld speeds up to 30 welds/sec. Keeping in the Orion tradition of excellent customer service, training, and support we have added on-screen resources, which include video tutorials and a detailed product user manual. The patent pending Orion 200i² gives you the precision and speed of a laser with the versatility, power, and ease of a pulse arc welder.

Industries

- Jewelry
- Medical
- Industrial
- Dental

Applications

- Filling Porosity
- Seam Welding
- Wire Beading
- Posts
- Small Wire or Chain
- Eyeglass Repair
- Holloware
- Jump Rings
- Watches
- Mold and Die Repair
- Tack Pieces Together
- Ring Resizing
- Prong Re-Tipping
- Bracelets
- And So Much More!

Dimensions

Features

- 10" touch screen display
- Pico mode for extremely small and precise welds
- 3 Pulse Waveforms – Classic, new Triangle, new Square
- Seam mode – weld up to 30 welds/second
- High frequency agitation – including new negative agitation
- Internal weld monitoring to provide weld consistency and automatically optimize weld parameters
- Advanced waveform shaping options
- Adaptive Weld Ignition™ – for extended electrode tip life
- Intelligent Welding™ & MyWeld™ software
- Updateable software via USB port
- Pulse arc and resistance welding technology in one machine
- 5x Microscope
- Weld energy selection – Set energy by dial, or by keypad. Adjustable from 0.01 – 200 Joules

Orion 200i² Pulse Arc and Resistance Welder

Welder Type	Pulse-Arc and Resistance
Weld Modes	5
Pre-Programmed Metal Settings	15
Customizable Save Settings	Unlimited
Languages	20 + (Ask rep if we have your language)
Display	10" Touch Screen
Energy (ws)	0.01-200 ws
Weld Spot Diameter	≈ 0.1 - 4.5mm
Switching Power Supply	110/240VAC (Auto Detected)
Footprint (Actual bench space being used)	L x W x H - 4" x 5" x 27" (10 x 12.5x 68.5cm)
Weight (As seen in above image)	28 lbs (13 kg)
Microscope Specs	5x
Microscope Eye Protection - Darkening Lens	IR 16 / UV 16
